

Narayana Hrudayalaya
Charitable Trust

**BREAST CANCER HUB
GRANT UTILISATION REPORT**

PERIOD: JANUARY' 20 – MARCH' 20

Narayana Hrudayalaya Charitable Trust

Introduction:

According to World Health Organization (WHO) Global Health Expenditure database, in India, the out of pocket healthcare expenditure ranges from 85.5 % to 89.0 % in the years of 2010 to 2015. High medical bills and the lack of access to affordable healthcare push nearly 3.9 crore of the population in the country into poverty. Many lives are lost each year due to inability to pay for life-saving surgeries and procedures. It shows a felt need to provide quality and affordable health care to economically deprived population at primary, secondary and tertiary levels, especially for expensive treatments for non-communicable diseases including surgeries and related diagnosis in India.

Narayana Health (NH) thrives to live up to the purpose of not to turn back any disadvantaged patient for lack of funds. Through the Narayana Hrudayalaya Charitable Trust and chain of hospitals across India, Narayana Health is committed towards provision of healthcare to patients from lower socio-economic status. The poor patient support program was conceptualized to enable corporates, philanthropic institutions and individuals to join NH in our journey towards providing monetary support for those patients who are unable to afford healthcare expenses or facing catastrophic medical expenses.

The catastrophic nature of expenses is especially pervasive in cancer and cardiac treatment. The financial burden induced by treatment ends up pulling families way below the poverty line towards destitution.

The grant amount from **Breast Cancer Hub (BCH)** has been set aside for paediatric and adult oncology patients from under privileged backgrounds or who have already incurred catastrophic medical expenditure. The primary objective of the grant is to ease the burden on the families who are already under financial as well as emotional stress.

Narayana Hrudayalaya Charitable Trust

THE PROCESS FOR POOR PATIENT SUPPORT:

- Needy patients approach medico-social work department of respective hospital to seek financial support based on the cost estimate of the surgery/procedure
- Socio-Economic evaluation/assessment of the patients done with appropriate documentation by medico-social workers
- Required surgeries/procedures are carried out at Narayana Health group of hospitals utilizing appropriate amount of funds
- NH CSR Team oversees the smooth sanctioning of funds and processing of payments ensuring the patients face no hassles
